

ORGANIC & INORGANIC COMPOUND FERTILIZER

JIANGXI RUTOM BIOTECHNOLOGY CO., LTD

TOP 10 ORGANIC FERTILIZER MANUFACTURER IN
CHINA <https://rutoms.com> | jason@rutoms.com

WHAT'S ORGANIC INORGANIC INTEGRATED FERTILIZER

Powder, 2-4mm, 0.8-1.5mm products are available

THE ADVANTAGES OF ORGANIC INORGANIC FERTILIZER

- Organic and inorganic nutrients are integrated.
 - Less leaching in the soil
 - Improves fertilizers efficiency.
 - Improves soil aggregated structure and supply long – lasting nutrients at the same time.
- Supply multiple types of nutrients including
- macronutrients, secondary nutrients and trace elements.
 - Cost- effective and obtain better quality of harvest.
 - Alleviate abiotic stress of plants.
 - Regulate soil pH level.

GRANULE
2-4MM

Benefits

- Organic and inorganic ingredients integrated in the core.
- High nitrogen and high potassium compound fertilizer, advice to use on fruits.
- Excellent food for microbial, improves soil fertility and soil aggregated structure.
- Contains multiple types of secondary nutrients and micronutrients.
- Less leaching and long- lasting nutrients and fast –acting nutrients all in one.

Application

- ∞ Apply on fruits, root harvest plants.
- ∞ Sparkle and mix with soil.
- ∞ Apply 750Kg -1000Kg per hectare.

GRANULE
2-4MM

Benefits

- Organic and inorganic ingredients integrated in the core.
- High nitrogen compound fertilizer, advice to use on rice, vegetables.
- Excellent food for microbial, improves soil fertility and soil aggregated structure.
- Contains multiple types of secondary nutrients and micronutrients.
- Less leaching and long- lasting nutrients and fast –acting nutrients all in one.

Application

- ∞ Apply on vegetables, rice field.
- ∞ Sparkle and mix with soil.
- ∞ Apply 750Kg -1000Kg per hectare.

POWDER

Benefits

- Organic and inorganic ingredients mixed product.
- Contain 3 types of beneficial bacteria, effective live bacteria 200,000,000 CFU/gram,
- Supply both fast- acting and slow-release nutrients.
- 100% water soluble nutrients for foliar spraying and soil irrigation.
- Activate the soft, make soil fluffy and easier to retain water, nutrient and hold temperature.

Application

- ∞ Apply on any soil condition.
- ∞ Use 1: 800 with water, for soil irrigation or spraying.

POWDER

Benefits

- Organic and inorganic ingredients mixed product.
- Contain 3 types of beneficial bacteria, effective live bacteria 200,000,000 CFU/gram,
- Fulvic acid based organic matter source
- 100% water soluble nutrients for foliar spraying and soil irrigation.
- Make the soil fluffy, soft, easier to retain water, nutrient and keep warm.

Application

- ∞ Apply on any soil condition.
- ∞ Use 1: 800 with water, for soil irrigation or spraying.

APPEARANCE
GRANULE

Benefits

- Fulvic potash derived organic and inorganic integrated nutrients.
- 100% water soluble, fast – acting organic fertilizer.
- For the above-ground parts of crops, it can promote the growth of stems and leaves.
- Promote a better soil aggregated structure and improve soil fertility.
- Improve crop's ability to fight against environmental threat.

Application

- ∞ Apply on any soil condition.
- ∞ For all crops, by sparkle into soil and mix, as top-dressing fertilizer.

Benefits

- Organic and inorganic granule bulk bending product.
- Specially designed for rice plantation.
- More cost- effective than traditional products and less leaching in the filed.
- Amino acid contained, organic matter input, high quality harvest guaranteed
- Easier to apply and less labor cost.

Application

- ∞ Apply for rice, at the early stage of growth.
- ∞ Use 750Kg per hectare, spread on the rice land.
